

COMMUNITY INDICATOR: DEMOGRAPHICS REPORT

ARIELLA DAVIS AND JAEHEE WON

Introduction: Demographics

The demographic indicators of a community are an integral tool in discerning the characteristics of residents and identifying consequent risk factors associated with the composition of the population. Demographic information is employed not only as a fundamental reference for other indicators, but as an index of historical trends, changes in population over time and to identify issues of concern.

Onondaga County is part of the Syracuse Metropolitan Area. Metropolitan Statistical Areas (MSAs) as defined by the Census Bureau are geographic entities defined by the Office of Management and Budget (OMB) as a core urban area with a population of 50,000 or more. Each metro area consists of one or more counties and includes the counties containing the core urban area, as well as any adjacent counties that have a high degree of social and economic integration (as measured by commuting to work) with the urban core. The Syracuse MSA is a 3,083 square-mile area which has consisted of Madison, Onondaga and Oswego counties since 2003. Population increased within the county and decreased in the city. The Syracuse MSA population increased from 2009-11 from 646,084 to 662,553.

In Onondaga County, the median age is 30 years old with 62% of the population reporting their race as "White" and 64% of the county population reported being in a married family household. Conversely, in Syracuse, the median age is 39 years old with 84% of the population reporting their race as "White." 39% of Syracuse residents reported living in a married family household. 15% of the population in the city of Syracuse is composed of 18-22 year olds in 2010 while 48% of both county and city population are male.

The median household income in Syracuse has increased since 2010 from \$29,621 to \$31,689 in 2011 and in Onondaga County from \$50,426 to \$52,636. The percent of families living below the poverty level in both Onondaga County and Syracuse has increased. 25.1% of Syracuse families were below the poverty level in 2009, compared to 26% in 2011. The percent of Onondaga County families living below the poverty level was 9.4% in 2009, compared to 9.5% in 2011.

AVERAGE PERSON IN SYRACUSE, NY, 2011:

Age: 39 years
 Income: \$31,689
 Race/Ethnicity: White
 Marital Status: Married

Comment: The total number of households in Syracuse is 55,768.

Syracuse Median Household Income by Age, 2007-11			
Age	Percent	Income	MOE
15 to 24 years	9.30%	\$12,909	+/-1,357
25 to 44 years	38.10%	\$34,688	+/-1,985
45 to 64 years	35.60%	\$37,358	+/-1,761
65 years and over	17.10%	\$26,570	+/-1,811

How the Census Bureau Determines Poverty Status:

Since ACS is a continuous survey, people respond throughout the year. Because the income questions specify a period covering the last 12 months, the appropriate poverty thresholds are determined by multiplying the base-year poverty thresholds (1982) by the average of the monthly inflation factors for the 12 months preceding the data collection. See the table titled "Poverty Thresholds in 1982, by Size of Family and Number of Related Children Under 18 Years (Dollars)," for appropriate base thresholds. See the table "The 2011 Poverty Factors" in Appendix A for the appropriate adjustment based on interview month.

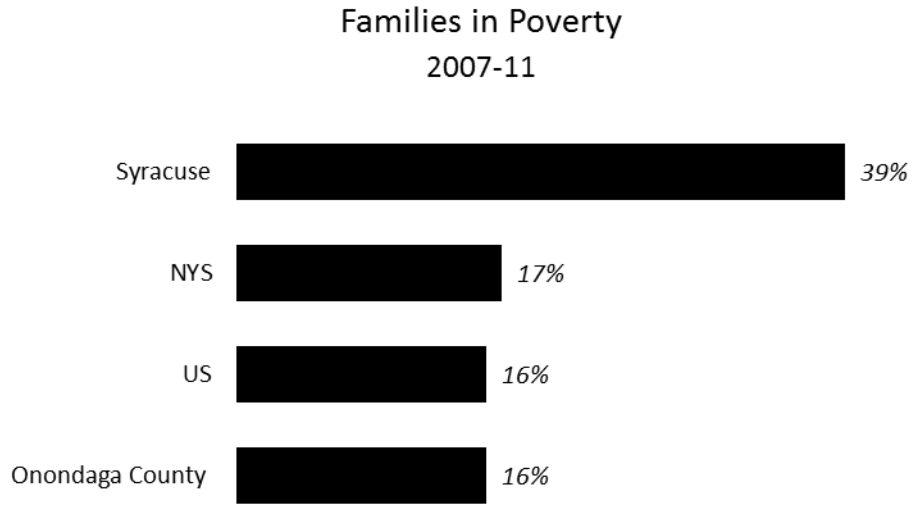

Size of family unit	Related Children under 18 years								
	None	One	Two	Three	Four	Five	Six	Seven	Eight or more
One person (unrelated to individual)									
Under 65 years	5,019								
65 years and over	4,626								
Two persons									
Householder under 65	6,459	6,649							
Householder 65 +	5,831	6,624							
Three persons	7,546	7,765	7,772						
Four persons	9,950	10,112	9,783	9,817					
Five persons	11,999	12,173	11,801	11,512	11,336				
Six persons	13,801	13,855	13,570	13,296	12,890	12,649			
Seven persons	15,879	15,979	15,637	15,399	14,955	14,437	13,869		
Eight persons or more	17,760	17,917	17,594	17,312	16,911	16,403	15,872	15,738	
Nine persons or more	21,364	21,468	21,183	20,943	20,549	20,008	19,517	19,397	18,649

Comment:

- The raw data for this category is unavailable.
- To determine a person's poverty status, one compares the person's total family income in the last 12 months with the poverty threshold appropriate for that person's family size and composition. If the total income of that person's family is less than the threshold appropriate for that family, then the person is considered "below the poverty level," together with every member of his or her family. If a person is not living with anyone related by birth, marriage, or adoption, then the person's own income is compared with his or her poverty threshold. The total number of people below the poverty level is the sum of people in families and the number of unrelated individuals with incomes in the last 12 months are below the poverty threshold.

People in Poverty, 2007-11		
	Percent	MOE
Syracuse	32.3%	+/-1.5
Onondaga	13.8%	+/-0.6

21. Syracuse has the highest percent of people living in poverty of selected upstate New York cities.

Comment:

- The category "Other" is defined by the American Community Survey as all other responses not included in the “White,” “Black or African American,” “American Indian or Alaska Native,” “Asian,” and “Native Hawaiian or Other Pacific Islander” race categories

with Respondents reporting entries such as multiracial, mixed, interracial, or a Hispanic, Latino, or Spanish group in response to the race question included in this category.

- The category "Native Hawaiian and Other Pacific Islander" was removed because the representation in this category is not statistically significant to record above 0% of the population.

Race and Ethnicity in Selected Upstate Cities, 2007-11								
	Albany (N=97,879)		Buffalo (N=263,914)		Rochester (N=211,457)		Syracuse (N=144,883)	
	Percent	Number	Percent	Number	Percent	Number	Percent	Number
